AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Pear-march1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

An examination of your Rainfall return for 1925 suggests that omissions have occurred on April 24 and November 6th & 11th also that the accumulated entries for May 12-15 and Dec^r 19-21 are high compared with surrounding stations.

	Woodside Pear-march	Place House Pear-march	Beckley
April 24	.18	-	.16
May 12-15	-	.30	-
Nov 6	.84	-	.76
" 11	.15	-	.22
Dec 19-21	1.92	3.26	1.66

If you have no reason to the contrary we would recommend that values of .15, .03, .75, .15 and 2.26 respectively be adopted.

I should be glad to have your comments.

12-4-26

REPLY.

I quite agree that ~~a~~ mistakes must have been made. I had ~~at~~ difficulty in trying to fit my readings in with the Woodside readings which I obtained privately. Doubtless the figures you suggest will make the return more accurate.

Your ~~these~~ figures however make the total for the year 35.54 whereas the year's reading on my registering rain-gauge was certainly ~~37~~ 35.73, a difference of .19. I think, therefore, there must be a further omission of .19 probably in October or November.

Elm. Kewell

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

Every observer is requested to fill in this section and also the space for notes as far as possible:—

Name and Address to which any inquiry relating to this register should be sent:—

Lt Col. G. W. LIDDELL
PLACE HOUSE, PEASMARSH, SUSSEX

Hour of observation by the clock—in Winter.....in Summer.....

Nearest Railway Station..... RYE Distance 4 miles Direction from gauge S. E.

Nearest Parish Church at..... PEASMARSH Distance 300 yds Direction from gauge E.

Nature of objects nearest to gauge	Trees.	Trees	Trees	Bushes
Heights of objects	50 yds	50 yds	50 yds	50 yds
Distances	about 60'	about 60'	about 60'	about 15'
Directions from gauge	N	S	W	E

If gauge has been moved during the year state—

Date of move..... Distance..... Direction.....

Indicate pattern of gauge in use by deleting those sketches of cross sections of gauges which do not represent it. If the pattern is different from any of these please make a sketch of it. (Good gauges to use are those marked A and B.)

If the gauge is of a self-registering or self-recording type please give particulars.

If you know of any record of rainfall not quoted in British Rainfall, please give the observer's name and address:—

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied:—

- Is it known that the gauge was empty at the beginning of the measured rainfall?
- What note was made of the times of beginning and end of this fall?
- When was the measurement made?

I regret that owing to continual absence from home during the year I am unable to give daily or even monthly readings with any accuracy—the years total is as recorded.

D

INSTRUCTIONS.

1. Rules for measuring the rainfall and for correctly recording the measurements are given in "Rules for Rainfall Observers," to be obtained gratis from The Director, Meteorological Office, Air Ministry, London, W.C.2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type*:—

- Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.

9 a.m. Greenwich Mean Time is 10 a.m. by the clock during Summer Time Period.

- The rain gauge should be visited every morning without exception. When there has been no precipitation the entry in the register should be a dash — (not '00). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

- When there is less than '005 in. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

- The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

- On some measures there is graduation marked '005; this graduation is to show the limit between the amounts which count as '01 and those which are mere "traces." An entry '005 is not to be made in the register.

- If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus 17 | 14 | would show that the reading on 18 |

the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was 14 in.

- The total rainfall for the month is found by addition. The addition should always be done a second time as a check. The check is of special importance when the total has already been found in another copy of the register.

- The "number of days with '01 in. or more" includes all the days with any rain except those for which the entry is "trace." The "number of days with '04 in. or more" includes all the days with any rain except those for which the entries are trace, '01, '02, or '03.

- If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.
- The heaviest daily fall for each month should be underlined.

TRY. *Ex OFF*
RAINFALL ORGANIZATION.
FALL IN 1923.

568
A

Kept at LORENDEN, OSPRINGE, FAVERSHAM, KENT
1.1.1923 to 25.5.1923 945
in the County of WOODSIDE, PEARMARSH, SX
A.W. RICKARDS, M.A.
by WOODSIDE, PEARMARSH, SUSSEX

Lat. _____ Long. _____
Time of Observation 9 a.m.
Nearest Railway Station RYE
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 9 ft.
" " " " Sea Level 100 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day.
An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.
Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 182 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
REGISTER OF RAINFALL IN 1922.

Kept at XAVERIAN COLLEGE,
MAYFIELD.
in the County of SUSSEX
by F. A. Hollingshead.

Lat. 51 2 N Long. 15 16 E.
Time of Observation 9 a.m. G.M.T.
Nearest Railway Station MAYFIELD
Diameter of Funnel of Rain Gauge 5 in.s
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 400 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

Kept at Nº 2 Pumping Station, Pevensey.
in the County of Sussex.
by Eastbourne R. D. C.

Lat. _____ Long. _____
Time of Observation 9.30 am.
Nearest Railway Station Pevensey & Westham.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. _____ in.
" " " " Sea Level 12 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.
METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
REGISTER OF RAINFALL IN 1922.

Kept at No. 2 Pumping Station, Paveney.
in the County of Sussex.
by Eastbourne Rural District Council.

Lat. _____ Long. _____
Time of Observation 9.30 am.
Nearest Railway Station Paveney & Westham.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. _____ in.
" " " " Sea Level 12 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1921.

Kept at "Eagle Slope" Piltdown
Uckfield
 in the County of Sussex
 by Wm. M. Alderton

Lat. 50° 58½' N Long. E. London 0° 4'
 Time of Observation 9 AM
 Nearest Railway Station Uckfield 2½ miles
 Diameter of Funnel of Rain Gauge 5 in.
 Height of top of Gauge above Ground 1 ft. 4 in.
 „ „ „ Above Sea Level 100 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
 If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day.
An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

[P.T.O.]

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Rusington1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

An examination of your return for 1925 indicates that omissions have occurred on certain days.

A comparison is given below.

Littlehampton Rusington Lynminster

Jan 1	1.09	-	1.13
" 27	.11	-	.15
Aug 22	.28	-	.21

If you have no reason to the contrary we would suggest the adoption of 1.00, .15 and .30 inch respectively, making the totals for the months 4.39 and 3.06 ins respectively and for the year 35.31 inches.

J.
12/4/26

REPLY.

1st Jan. Should read 1.16 omitted by error.

27th Jan. I have no record of rain falling on this day I am adopting your suggestion of .15

22nd Aug The fall on this date is included in .98 recorded 23rd Aug.

J.M.

19/4/26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted.....
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division

(Signed) Walter Dawes [P.T.O.]

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Fairfield House Ryde 1925.

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

An examination of your return for 1925 indicates that the reading on December 23rd is an inch too high. A comparison is given below.

Winchelsea	·08
Udimore	·07
Fairfield House	1·07
The Point Ryde	·07
Pearsmarsh	·10

If you have no reason to the contrary it is proposed to adopt a value of .07 inch making a total for the month of 4.65 and for the year 29.81 inches.

of 12.4.26

REPLY.

Thank you for pointing out clerical error on 24th Dec 25. My total for ^{year} 1925 is 5.68 & deducting 1.0 reduces it to 4.68. I fail to understand your total of 4.65 & diff of 3. Again my total for the year was 31.11 & after deducting the error of 1.0 reduces it to 30.11 but you say it should be 29.81! How do you acc. for this difference?

Walter Dawes
 answered
 on 12.4.26
 20.10.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

REGISTER OF RAINFALL IN 1921.

Kept at *St Leonards (West Marina Gardens)*
 in the County of *Sussex*
 by *W. Ruskin Butterfield*

Lat. *50° 51'* Long. *0° 33' E.*
 Time of Observation *0900 h.*
 Nearest Railway Station _____
 Diameter of Funnel of Rain Gauge *8* in.
 Height of top of Gauge above Ground *1* ft. *0* in.
 " " " " Sea Level _____ ft.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
 If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1921

Kept at Bowden House, Seaford
 in the County of Sussex
 by J. F. Thomas

Lat. 50° 47' 10" N Long. 0° 6' 30" E
 Time of Observation 9 AM
 Nearest Railway Station Seaford
 Diameter of Funnel of Rain Gauge 5 in.
 Height of top of Gauge above Ground — ft. 9 in.
 " " " " Sea Level 190 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM 1090.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION

REGISTER OF RAINFALL IN 1922.

Kept at Bowden House, Seaford,
in the County of Sussex
by J. F. Thomas

Lat. 50° 47' 10" N Long. 0° 6' 30" E
Time of Observation 9 AM 79 AM Summer time
Nearest Railway Station Seaford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground — ft. 19 in.
" " " " Sea Level 190 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090.

AIR MINISTRY
METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.
REGISTER OF RAINFALL IN 1923.

Kept at Selham
in the County of Sussex
by gardeners of O.C. Lacaito Esq.

Lat. 50° 58' Long. 0° 41'
Time of Observation 9 AM
Nearest Railway Station Selham L.B.S.R.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 115 ft.

Jan. 1, following.
- 08

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

Jan 15th 1925

SELHAM HOUSE,

Wth, PETWORTH.

I regret that my gardener has made rather a mess of his record this year, by entering the daily rainfall each day in an old diary of an earlier year!

I began to try to correct in red, but could not carry it through.

Probably the totals are all but correct, if not

quite, but the ~~exact~~ dates
are often wrong by one day,
and one or twice by two days.

Nevertheless I return
the form for what it
may be worth to you

This inaccuracy will not
occur again

Return adjusted for day of passage

C. C. Lacaita

REGISTER OF RAINFALL IN 1921

FIELD
GAUGE

Kept at Selby Hill
in the County of Sumner
by W. H. Handley F.R.S.

Lat. _____ Long. _____
Time of Observation _____
Nearest Railway Station Ashtone
Diameter of Funnel of Rain Gauge _____ in.
Height of top of Gauge above Ground _____ ft. _____ in.
" " " " Sea Level _____ ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

REGISTER OF RAINFALL IN 1923

Lat..... Long.....

Time of Observation.....

Nearest Railway Station.....

Diameter of Funnel of Rain Gauge.....in.

Height of top of Gauge above Ground.....ft.....in.

Sea Level.....ft.

If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

[Please fill in the other side also.]

Particulars of Station.

* Every observer is requested to fill in this section (especially if a change has been made in the position of the gauge or in its exposure), and also the space for notes as far as possible:—

Name and Address to which any correspondence relating to this register should be sent:—

Latitude of Station..... Longitude..... Hour of observation.....

Nearest Railway Station..... Distance..... Direction.....

Nearest Parish Church..... Distance..... Direction.....

If gauge has been moved during the year state—

Date of move..... Distance..... Direction.....

Nature of objects nearest to gauge				
Heights of objects				
Distances ...				
Directions...				

Indicate pattern of gauge in use by deleting those sketches of cross sections of gauges which do not represent it. If the pattern is different from any of these please make a sketch of it. (Good gauges to use are those marked A and B.)

If you know of any record of rainfall not quoted in *British Rainfall*, please give the observer's name and address:—

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied:—

- Is it known that the gauge was empty at the beginning of the measured rainfall?
- What note was made of the times of beginning and end of this fall?
- When was the measurement made?

D INSTRUCTIONS.

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C.2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type*:—

- Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.

- The raingauge should be visited every morning without exception. When there has been no precipitation the entry in the register should be a dash — (not 0.0). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than .05 mm. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

- The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

- On some measures there is graduation marked .05; this graduation is to show the limit between the amounts which count as 0.1 and those which are mere "traces." An entry .05 is not to be made in the register.

- If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus 17 } 3.6 would show that the reading on 18 }

the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was 3.6 mm.

- The total rainfall for the month is found by addition. The addition should always be done a second time as a check. The check is of special importance when the total has already been found in another copy of the register.

- The "total number of days with 0.2 mm. or more" includes all the days with any rain except those for which the entry is "trace" or 0.1 mm.

- If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

- The heaviest daily fall for each month should be underlined.

FORM 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Brighton Corporation Waterworks
Shoreham
 in the County of Sussex
 by _____

Lat. _____ Long. _____
 Time of Observation 9 Am
 Nearest Railway Station Shoreham
 Diameter of Funnel of Rain Gauge 8 in.
 Height of top of Gauge above Ground 1 ft. 9 in.
 " " " " Sea Level 12 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

ADDRESS ALL COMMUNICATIONS TO THE COMPANY.

Elmhurst Farm,

Stinfold, Sussex.

20th March, 1925.

Dear Sirs,

With reference to your Circular Letter of the 17th March, please find herewith our Rainfall Sheet for 1924.

We are afraid this will not be of much use to you, as you will see that only the last three months are completed, as we did not start recording until September 22nd.

Yours truly,

The Elmhurst Farming & Trading Co. Ltd.

W.E. Gaddes

Asst. Secretary.

The Meteorological Office,
Air Ministry,
Adastral House,
Strand, W.C.2.

FORM 1090.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

473 A

Register of Rainfall in 1925.

Kept at Shiprods, Shinfold
in the County of Sussex.

Observers are requested to read the instructions printed overleaf before filling in this form.

Every Observer should fill in section C overleaf.

Diameter of Funnel of Gauge 5 in.
Height of top of Gauge above Ground ft. in.
" Ground " Sea Level ft.

THE MORNING MEASUREMENT IS CREDITED TO THE PREVIOUS DAY.

Jan. 1. following.

An observer who does not conform to this rule should insert the reading made on January 1st of the following year in the space on the right of this paragraph.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1921

Kept at Hill House, Turners Hill
in the County of Sussex
by R. M. Rieuwendaal

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Grange Road
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 6 in.
Sea Level 477 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

REGISTER OF RAINFALL IN 1922.

Kept at Hill House Turners Hill
in the County of Surrey
by R. M. Ravenshaw

Lat. _____ Long. _____
Time of Observation 9 a.m.
Nearest Railway Station Grange Road LBS&CR
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 477 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C.2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Bill House, Turners Hill, 1925.

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

REPLY.

An examination of your rainfall return for 1925 suggests that an omission of an inch has occurred on February 25th.

A comparison is given below

INS

Worth	1.37
Crawley Down	1.34
Turners Hill	1.35
Brockhurst Obs.	1.42

If you have no reason to the contrary we would recommend that 1.35 be adopted.

There is also a discrepancy between the total for July and the sum of the daily values. The correct total appears to be 4.17 inches.

J.B. 16
12-4

Am sorry for an error in record: please adopt 1.35 for Feb. 25th '25

I have only the monthly totals in duplicate to refer to. & July appears as 4.11 inches

R. H. Ravenshaw

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..... ARL
2. Necessary corrections made in Monthly Return.....
3. " " " " Weekly (Form 3110).....

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division

RAINFALL ORGANIZATION.
ALL IN 1921

Kept at Oldlands Hall
in the County of Sussex
by F. Schuster Esq.

Lat. 57 Long. 0.8 E
Time of Observation 9 a.m.
Nearest Railway Station Uckfield
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 3 ft. in.
" " " " Sea Level 400 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day.
If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.
